Rain is Needed. Reports come every day from this county indicating the most distressing ravages of the long-continued drought. The tobacco crop will be small at best, not more than half a crop being planted owing to a lack of any season. Corn is suffering greatly, and unless a rain in a few days will be all out a total failure on all but low lands. The wheat has been sown and is of a very fine quality. The drought seems to be wide spread. The Oronochos Inquirer says of it:

An Inquirer reporter interviewed local and representative farmers from all sections of the county to-day about the drought. The planters are very blue and say if they do not have rain in a few days the tobacco crop will be an absolute failure. A good rain would mean in about half a crop. The corn crop is standing the drought remarkably well. A river farmer who grows very large crop of small corn laid by his corn and one more good rain would make an average crop. The gardens are literally burnt up by the drought, and the price of vegetables will be high.

There has been a very good yield of wheat. Mr. B. Greiner, who is the largest potato raiser in the Green River country, said the dry weather had cut short his early crop, but the late crop had not been affected, as August weather was good and the potatoes were sweet. Sweet potatoes and watermelons will be better than last year's in this county, and the price of both will be out of sight.

Mr. Fleming Shale, a leading farmer and stock raiser of Ohio county, said that there had not been a good rain over there since the first Sunday in May. He said the tobacco crop was very blue and the corn crop was very small. Mr. W. T. Owen, wife of our honored Circuit Judge, has been very sick at her home in Oronochos for some weeks. Her illness has been no severe that Judge Owen has been obliged to leave his home in Oronochos. At last accounts she was no better.
